

Knowledge Organiser

Year 2 Summer Term – Our Local Area

Key vocabulary

village, city, town, field, soil, plants, conservation, travel, local, farm

Geography Knowledge

- To understand how to read maps and plans of our local area
- To use geographical language to describe our local area such as field, village, soil, farm
- To know that not all people live how we do by comparing our village with an urban area in Kenya

Numeracy Knowledge

- To collect data on the different ways children travel to school and put the data into a block graph

Science Knowledge

- To understand which plants grow locally and that the climate influences the plants growing in our area
- To understand why the conservation of bees is important for plants and the environment

Glossary

Vocabulary	Meaning
city	A city is a large or important town. Our capital city is London.
conservation	Conservation includes restoring habitats and protecting species like bees.
farm	An area of land used for growing crops and keeping animals for food.
field	An area of open land.
local	Our neighbourhood is our 'local' area.
plants	A living organism like trees, shrubs or herbs.
soil	The earth in which plants grow.
town	A town is an area that has a local government.
travel	To make a journey.
village	A small community in a rural area such as Ettington.
