RE – Religion and Worldviews

Religious Education allows children the opportunity to gain a broader, in depth understanding of different religions and what other believe, as well to consider and share their own beliefs. It enables pupils to know about, understand and respond to the important and ultimate questions of life. RE is taught in such a way that it enables all to flourish as it inspires pupils to explore, develop and affirm their own faith and values and have respect for the faith, beliefs and values of others. Opportunities are used to make links to and reflect on our key values of love, respect and trust.

Through providing high-quality, explicit RE teaching, children have the opportunity to reflect on and analyse a variety of different beliefs and world views, gaining a knowledge and understanding of diversity within and across religions to follow our vision of everyone being loved, valued, celebrated and represented. Children are encouraged to consider, express and evaluate their own views on a range of issues. We look at different worldviews through the 3 disciplinary areas of theology, philosophy and human and social sciences. This means children are given the opportunities to reflect on how beliefs shape the way humans see themselves, the world and others, investigate what humans claim to know and ways in which religion and belief impact on living.

Through critically engaging with Biblical texts and exploring core theological concepts, children are given opportunities to develop knowledge and understanding of Christian beliefs and practices and the influence this can have on believer's lives. Children consider the impact and connection that Christianity has on Britain's cultural heritage and the lives of people worldwide. Children develop knowledge and understanding of other major world religions and worldviews, and their impact on society and culture. This allows children to have greater understanding of diversity and the wider world.

Opportunities for enhancing the spiritual well-being of learners are developed through the RE curriculum. Learning activities in RE provide for the needs of all pupils, offering a safe space to explore their own religious, spiritual and philosophical ways of seeing, living and thinking, believing and belonging. They provide opportunities to engage in meaningful and informed dialogue with those of all religions and worldviews, linking these to pupils' ideas of spirituality.

Governments collect data about people’s beliefs and worldviews as part of a census and this shows numerical changes. Social scientists try to interpret why these changes have happened and what they might mean for society as a whole. Religions and worldviews can have shared practices and values e.g. charity work or teachings on morality. Sikhi is a good example of this with its teachings on equality based on its founder, Guru Nanak, and the focus on the langar. People do not always change their views or practices, in spite of institutional changes to their religion or worldview. Religions may change and adapt as they interact with specific cultures.
