

My name is Kerry Hughes and I am a parent governor.

I work as an Investment Director at a fund where I invest into large scale renewable energy projects and forestry. I am a qualified accountant and have board level experience. I studied physics at university and have a passion for STEM and the environment.

We moved to the area 3 years ago, in time for our oldest child to start school at Ettington Primary, she is now in year 1. It's a privilege to be appointed a parent governor, I want to support the school using my skillset and my passion for access to an excellent education for all children.
