

Ettington Primary School Knowledge organiser Plants

Year 3

Vocabulary

- Plant**- a living thing that usually grows from the ground.
- Germinate**- start of growth.
- Photosynthesis**- plant uses sunlight to make food for the plant.
- Pollination**- flower reproduction.
- Animal dispersal**- seeds transported on animals through being buried, carried on fur, in berries or in poo.
- Water dispersal**- seeds are carried from one place to another in the water.
- Wind dispersal**- seeds are carried from one place to another by wind.
- Capillary action**- water being transported through the plant.

Pollination happens when an insect carries pollen from the male part of the plant (stamen) to the female part (pistil).
This allows the new plant to make new seeds and fruit.
