Living things and their habitats

Year 2

Vocabulary

Habitat - A place where something lives
Biome - A specific environment home to living things suited to the place or climate e.g. rainforest, desert, tundra, woodland, grasslands, savannah.
Microhabitat - A very small habitat. Habitat within a habitat.
Living - Being alive: move, breathes, sensitive to environment, nutrients, excretes, reproduce and grow.
Dead - Things that were once alive.
Never been alive - Things that were never living e.g. metal spoon, gold ring.
Life Processes - Movement, respiration, sensitivity, grow, reproduce, excrete, nutrition. These are things that all living things do.
Food Chain - A diagram showing how each animal gets its food.
Organism - A living thing, including plants and animals
Food Sources - This is a place a living thing's food comes from.
