

Environmental Prayer

Dear Lord,

Help us to respect the wonderful planet that you have given us to live in, let us honour the creation as the great gift it is. Give us the skills to care for the animals and plants and we pray that all the millions of species that are threatened with extinction by our current lifestyles will survive and thrive. Make us think twice about littering our beautiful world as it is the only world we will live in.

We pray that we will protect the trees so we can survive by breathing the oxygen they create, eating the fruit they produce and allowing them to provide homes for all the species of animals big and small that live in them.

Teach us how to stop global warming by becoming more caring towards the environment in which we live. Guide the politicians and developers to consider the environment when making important decisions. Allow us to make changes to our lifestyles by saving energy and water.

Let us celebrate the amazing planet you have given us.

In the name of the father, son and Holy Spirit.

Amen
